Notes:

- x This model allows students to take two L3 electives and four L4 electives, thus providing the depth and breadth required for an Electrical Engineering Degree.
- x L3 courses may be drawn from other schools and faculties as well as Telecommunications and Photonic Engineering core courses.
- x L4 electives are provided from the six disciplines within the School.
- x One L3 course may be substituted by a L2 elective.

Rules governing substitutions, pre-requisites and student exchanges

To suit the special abilities or needs of individual students a limited number of course substitutions are permitted within each program. Any such substitution must have prior approval of the Head of School.

- f* Substitutions must be of at least the same length and level as the prescribed course.
- f* Core courses may not be substituted with other courses.

- f* Substitution is not normally permitted if it unduly restricts the range of courses studied to only one area of specialisation.
- f* Progression to 'next level' courses is not permitted without satisfying the nominated pre-requisites.
- f* In the case of a combined degree program, accreditation of any course in more than one program is not permitted.
- f* Prior School consent is required for any accredited substitution. This includes any courses taken from other schools at the student's own initiative.
- f* Substitution is not normally permitted in the first two years of the program.
- f* Substitution of one postgraduate course within the School is permitted, provided a similar course is not offered at the undergraduate level.
- f* Student exchanges are permitted, and students are encouraged to organise their exchange in the second session of their third year in order to simplify the process of accrediting substitutions.

Rules Governing Elective Courses

Transfer from Other Programs/Advanced Standing Students/Mid-Year Entry

The introduction of year 1 (L1), year 3 (L3) and year 4 (L4) electives accommodates students who are transferring from another program, are advanced standing or are in mid-year entry, as it allows them to complete required number of units of credit within the stipulated time of the normal program.
