

MEMORANDUM OF UNDERSTANDING BETWEEN THE GOVERNMENT OF NEW GUINEA AND THE GOVERNMENT OF AUSTRALIA

The Government of New Guinea (hereinafter referred to as "the Participants"),

Recalling that the Participants are State parties to the 1951 Convention Relating to the Status of Refugees and its 1967 Protocol, and acknowledge the importance of inter-country cooperation to undermine the People Smuggling industry;

- The Participants share a longstanding bilateral relationship of cooperation on border management and law enforcement measures;
- The Participants have agreed to host an Assessment Centre for Asylum Seekers in Papua New Guinea;
- The Participants have agreed to implement innovative solutions that also address human smuggling;

The Government of Australia appreciates the offer made by the Government of New Guinea to host an Assessment Centre for Asylum Seekers in Papua New Guinea.

Recalling that:

- At the Fourth Ministerial Conference of the Bali Process on People Smuggling,

the Participants agreed to establish a Regional Cooperation Mechanism to combat people smuggling in the Asia-Pacific region.

The Participants also agreed to enhance their cooperation with relevant international organisations regarding the implementation of the Regional Cooperation Mechanism.

consistent with the core principles of the Convention.

- a. that the People's Army seek to undermine the People's armed struggle, including through the conduct of a disinformation campaign, including through the use of forged documents;
- b. that due to the People's Armed Struggle's continued existence, the People's Army continues to threaten the People's Armed Struggle;

Timing

Section 05: Unit 03: Part 01

Figure 1. Schematic diagram of the experimental setup. The light source (laser) emits light at $\lambda = 532$ nm. The beam splitter (BS) splits the beam into two paths. The first path contains a lens (L₁) and a polarizer (P₁). The second path contains a lens (L₂) and a polarizer (P₂). The two paths converge at a point where they are imaged by a camera (C). The distance between the lenses L₁ and L₂ is $d = 10$ cm.
