# Record Security Guideline

| Version | Approved by | Approval das21 Tf056 |
|---------|-------------|----------------------|

The use of                     ,                         ,                         and
                 can be provided on request, though is generally not recommended due to the additional administrative complexity their application can impart.

                     and                     govern access to the informational content of the record and are required for the other permissions to be available. For example, a document must be retrievable (View Metadata) to
