

Other cloth Face Mask points.

A face mask is a simple, effective way to reduce spread of COVID-19.

People can be infected and have no symptoms, so you cannot tell who around you is infected. *You* may be

Absorbent inner layer (cotton)

High thread count and fine weave

Ties (which tie at the back of the head) rather than ear loops. If using a mask with ear loops, you can get a plastic clip to join the ends together at the back of your head.

Fit around the face a nylon stocking tied over the mask and around the back of the head will provide good fit.

Does not have a valve
